**Subject:** FW: [External] Chemours - Additional Outfall 002 Results

Per the update today, sharing the lab data information. I will try to remember to shoot you any other high values we see from them, Floyd.

I should have thought to send this one.

Forwarding below email from Chemours on data and I inserted correspondence on data adjacent to the timeframe with added highlight.

The latest of our data from Athens is March 29<sup>th</sup>, so we have not seen our composite sampling results for this timeframe yet.

---- inserted prior email-----

Linda –

We do not have additional Test America results that include April 15, 2018. We do have internal, daily sample results for April 15, 2018. The internal preliminary result is 1,981 ppt [highlight inserted by LMC]. There was a rain event also on April 15, 2018 of 0.9 inches.

We believe this high result was due to ongoing remediation activities that involved an inspection that disturbed sediments in the cooling water channel.

We will submit the Test America results as soon as we receive them.

Thank you –  
Christel

Linda,

Please find additional Outfall 002 data that was received today, May 7, 2018.

Additional Outfall 002 Results

Please find below additional Outfall 002 results analyzed by Test America for HFPO Dimer Acid.

<u>Date Sample Collected (3.5-day Composites)</u>	<u>Results (ppt)</u>
Apr 16, 2018	680
Apr 19, 2018	46

- On April 16, 2018, the site had 0.92 inches of rain.

Thank you –  
Christel
